*Due to the high reproducibility standard deviation (>50%) for the following parameter no assigned value can be determined. Therefore, the calculated mean value MV +/- SD(2s) based on the data of the accredited laboratories (n) after outlier removal is listed for information and can be used for comparison as part of your internal QA measures.

P26 B Dibenzo[a,h]anthracene: MV (n=6, accr.) +/- SD(2s): 163 +/- 130 ng/l
